KEMIRA ALK

Aluminum Sulfate Dry

KEMIRA ALK, iron free aluminum sulfate, is a crushed, easy to dissolve, coagulant that can be used for water and wastewater clarification as well as many papermaking and other industrial applications. KEMIRA ALK is based on active trivalent aluminum compounds. KEMIRA ALK is especially suitable for potable water treatment and paper sizing.

Product Specification

Parameter	
Appearance	White-greyish
Aluminum (Al^{3+})	8,9 – 9,2 %
Aluminium as Al_2O_3	17,1 ± 0,3 %
Free acid (H_2SO_4)	<0 %
Bulk density	1000 ± 100 kg/m³

Typical Analysis

Parameter	
Active substance	Approx. 3,3 mol/kg
Iron (Fe_{tot})	<0,01 %
Sulfate $(SO_4)^{2-}$	47 ± 2 %
Chloride (Cl^-)	<0,01 %
Water insoluble	<0,1 %
Particle size	0-50 mm *

**Ask your local sales representative for available particle sizes.*

Quality

KEMIRA ALK is a coagulant that meets the European standard “Chemicals used for treatment of water intended for human consumption” EN 878 type 1. KEMIRA ALK, that meets the AWWA specifications, is available on demand.

Preparation of solutions and dosage

KEMIRA ALK is especially suited for storage in a silo, hence it can be fed to the dosing point in dry form or as a solution via a continous dissolver. KEMIRA ALK is recommended to be dissoled into a solution of 5-20 % if prepared continuously and 5-40 % if prepared batchwise.

Storage

KEMIRA ALK is slightliy hygroscopic and should be stored in dry surroundings. The product is stable at least two years when stored in bags. When KEMIRA ALK is dissolved the same storage recommendations as for KEMIRA ALS are applied.

Safe handling

KEMIRA ALK is irritating to eyes and respiratory system. If dust is produced use suitable protection.

The handling of any chemical requires care. Anyone responsible for using or handling KEMIRA ALK should familiarise themselves with the full safety precautions outlined in our Safety Data Sheet.

Packing and transportation

KEMIRA ALK is available in bulk, in 25 kg bags and also in bigbags.
